DEVELOPING WORLD'S MOST ADVANCED INDUSTRIAL SOFTWARE

FLK Tech is a high-end software development company with industry-specific expertise in industrial automation, electronics devices, embedded systems, and aerospace applications. With over 500 projects successfully completed, we've learnt a thing or two about project management.

We have dedicated project managers with substantial experience in managing complex development programs using a proven suite of management tools. Our commitment to managing to your Cost Of Goods Sold target commences immediately on project start and from our very first creative sketch.

Headquartered in Belluno, FLK have a special world ecosystem.

The main planning centers for management and sales for FLK Tech are concentrated in Belluno Italy, production business unit & partner unit are dislocate in Slovenia, Germany, India and China.

AT FLK WE BELIEVE THAT INDUSTRIAL SOFTWARE PRODUCT DEVELOPMENT IS DIFFERENT FROM

CUSTOM SOFTWARE DEVELOPMENT AND REQUIRES EXTRA SKILLS AND COMPETENCIES APART FROM HANDLING PROJECT LIFE-CYCLE PHASES.

Our substantial software team has the experience you need to deliver solutions that provide both the functionality and enhanced user experience that elevates a product above the mundane.

THE ADVANTAGE OF OUR TEAM INCLUDES

- Our experience over a large number of projects has allowed us to create a reusable library of software components that allow us to focus on developing quality and timely solutions to your problem
- we employ iterative development to put you in control of the outcome
- our software development processes that cover the full Software Development Lifecycles ranging from prototypes to fully regulated software, giving you confidence in the quality of our output
- multi-skilled software engineers who can work with you to understand your technology.

STRUCTURED INNOVATION FLK TECH YOUR PARTNER

WE THRIVE ON OPPORTUNITIES TO SOLVE COMPLEX PROBLEMS AND DELIVER DISRUPTIVE INNOVATION TO OUR CLIENTS. WE APPLY OUR CREATIVITY ACROSS ALL ASPECTS OF OUR BUSINESS; IN THE SOLUTIONS WE DELIVER, AND IN THE TOOLS AND PROCESSES WE APPLY.

In project challenges, we employ a Structured Innovation Process that ensures we focus on the challenges that are most important to you. Once we have defined the core challenge, we then draw on some of our most appropriate creativity tools and focus our creative abilities on generating innovative solutions to meet your needs.

Early in our process, creative ideas are assessed against a range of technical and commercial criteria. We explore the pros and cons of each solution with you including performance, functionality, user experience, development timeframes, cost (development, COGs, and technical risk, etc) so that an informed choice can be made about which options should be pursued that best meets your needs.

Finally our sophisticated ideas harvesting tools ensure that development effort is focussed on progressing only the most appropriate ideas.

Most important of all, we expect that you, our client, remain deeply involved throughout our innovation process providing much needed domain knowledge up front, and becoming an integral member of the creative process throughout.

HOME & INDUSTRIAL AUTOMATION SERVICES & CONSULTING

AUTOMATION CONSULTING

We are experienced automation, and networking consultants. We help our clients archive they business goals through the better application and with highest technological level.

FLK recognizes that technician in manufactory today have a tougher job that ever before . Selection of systems and components are very difficult , and each decision will dictate future decisions for many years. More than ever , plant automation, information and networking directly contribute to ability of the plant to meet manufactory goals. System Administrator, disarter recovery , standards, tecnology plans are always more important.

FLK Consulting provides the right service and products to turn tecnology components into well designed,administered,documented,supportable and high performing system.
